“Takes the gold” by Ramon Soler®

*The sophistication of the brushed gold finish in
the Alexia and Tzar collections by Ramon Soler®*

The most precious metal of all, **Gold** and its unmistakable golden color are one of the main trends in interior design, from which they always return to our most precious color palettes, to create wonderful spaces.

A desire object for centuries, the gold finish in contemporary interior design can be seen in coatings, furniture and decorative accessories, always providing a touch of sophistication, elegance, resistance and overwhelming energy, as well as a luminosity that reinforces each of the decorative elements that we integrate

into our projects. Its warm reflections and the ease of combining with other colors are some of the reasons for its success.

Alexia collection by [Ramon Soler®](#) made us fall in love with its exquisite design, it also captivated us in its matt black and brushed nickel version and this time, if we thought we couldn't be more surprised, we discovered it in **brushed gold**. As if that were not enough, the firm premiered in 2019 a totally surprising new proposal: **Tzar**, with cylindrical knob, conical body and of course, also available in a **brushed gold** finish. **Alexia** and **Tzar** collections dress the most innovative and avant-garde bathrooms, for their magnificent aesthetics, technology and sustainable character.

Tzar Brushed Gold by Ramon Soler®

ALEXIA & TZAR DESIGN

Its design, with sinuous lines and conical and ergonomic shapes, transmits delicacy as well as dynamism and lightness, with a conical spout that is crowned by a handle that, in the case of **Alexia**, reaffirms its character of maximum

elegance, while in **Tzar**, it is of an avant-garde essence and with a more daring touch. In addition, both collections integrate water saving systems, with an intermediate stop in the vertical opening path of their mixer, so that both aesthetic harmony and comfort and optimization of natural resources are achieved during use.

DURABILITY AND MAXIMUM RESISTANCE

[Ramon Soler®](#) uses advanced techniques to achieve these striking finishes, with materials and manufacturing processes that offer maximum resistance for daily use. The brushed gold finish by [Ramon Soler®](#) collections is made using the **PVD technique**, "Physical Vapor Deposition". It is an ionic coating process in which the surface of the part is covered with a highly resistant metal. A specific type of coating not only to provide aesthetic value, but also to protect against rust, wear, scratches, lime and sea water.

The complete proposal of gold finish washbasin taps for **Alexia and Tzar collections** has different types of solutions for washbasin, shower and bath, allowing to equip a complete bathroom with a lot of presence and style. They are perfect to add a touch of sophistication and contrast in the bathroom when we combine them with warm tones such as off-white, beige and a wide range of browns (for example, chocolate brown); and of harmony, elegance and sobriety when we combine them with black and with dark gray tones.

About Ramon Soler®

A mixers manufacturing company based in Barcelona since 1890, with facilities of 16,000 m² in San Joan Despí (Barcelona).

Its catalog offers a wide range of faucets and hydrotherapy systems that stand out for being eco-efficient, aesthetic, comfortable and highly reliable products. Ramon Soler® has created faucet models designed for people, seeking not only to create beauty, also comfort and precision in their mechanisms. For several decades, they have prioritized research to optimize not only the consumption of water and energy but also the optimization of materials and production processes.

Ramon Soler® has become an international reference brand because its products have been certified with the most demanding regulations and its commercial networks extend to 5 continents, in more than 50 countries.
